SPRING / SUMMER 2022

sassandbelletrade.co.uk

LOVINGLY

“Once again, for Spring Summer 2022 we have focused heavily on sustainability, challenging ourselves on material choices and techniques to find alternatives that are better for the environment.

Our new range of soft furnishings across several collections have been woven from recycled materials. Reclaimed plastic is shredded into strips and then heated and combed until tiny fibres appear.

These fibres are then treated in the same way any yarn would be spun to create one of our wonderful rugs or cushions. Despite being made from plastic, the fabric is super soft to the touch – you would never know they contain discarded plastic bottles.

Kenny”
